

CLAIMS

What is claimed to be new and desired to be protected by Letters Patent is set forth in the appended claims.

I claim:

1. An apparatus for a polarized film for attachment to the surface of a transparent medium, comprising:
 - a) a plurality of polarized films attached to the transparent medium and to each other, each of said polarized films having a top side and a bottom side;
 - b) an adhesive disposed on said bottom side of said film for attaching said film to the transparent medium and to each other; and,
 - c) a peel-off layer disposed on said adhesive in order to protect said adhesive.
2. The apparatus of Claim 1, wherein said plurality of polarized films have an opacity rating of from 5 to 55%.
3. The apparatus of Claim 2, wherein said adhesive has a curing time of about 72 hours.

4. The apparatus of Claim 3, wherein said polarized film further comprises vertical polarization apertures.

5. The apparatus of Claim 4, wherein said polarized film further comprises vertical polarization apertures of varying sizes.

6. The apparatus of Claim 5, wherein said polarized film further comprises angular polarization apertures.

7. The apparatus of Claim 6, wherein said polarized film further comprises angular polarization apertures of varying sizes.

8. The apparatus of Claim 7, wherein said plurality of polarized films further comprises polarized film having varying shapes of polarization apertures.

9. The apparatus of Claim 8, wherein said plurality of polarized films further comprises polarized film having varying sizes of polarization apertures.

10. The apparatus of Claim 9, wherein said polarized film has a tint for providing shading.

11. The apparatus of Claim 10, wherein said plurality of polarized films further comprise polarized film having different tints for providing shading.

12. The apparatus of Claim 11, wherein said polarized film is in a roll.

13. The apparatus of Claim 12, further comprising a transparent medium, wherein said transparent medium is a vehicle windshield.

14. The apparatus of Claim 13, further comprising a transparent medium, wherein said transparent medium is a vehicle side window.

15. The apparatus of Claim 14, further comprising a transparent medium, wherein said transparent medium is a patio door.
